THE RAILWAY TRACKS WE BUILD ARE THE LIFELINES OF OUR SOCIETY

For the construction of railway infrastructure, we combine more than 110 years of competence in the areas of national/international track construction and On-Track-Machines with our experience as a general contractor for network construction and infrastructure projects.

With pioneering spirit, know-how and inventiveness, we connect people and goods across Europe. The comprehensive range of services for our customers extends from

mastery of technical and logistical challenges through to the deployment of a modern fleet of machines right up to the implementation of integrated infrastructure projects. All this is only possible with qualified experts, a highly motivated team and smooth and cost-effective execution. The high level of in-house production at LEONHARD WEISS gives you the security you need for your project.

Your partner for the complete rail infrastructure.

SERVICE SPECTRUM

Track construction national / international

- Track construction, renewal and upgrades
- S&C renewals
- Track welding
- Rail Grinding
- Platforms
- Noise barriers
- Control and signalling and safety technology
- Inspection and maintenance
- Temporary bridges
- Crane ways

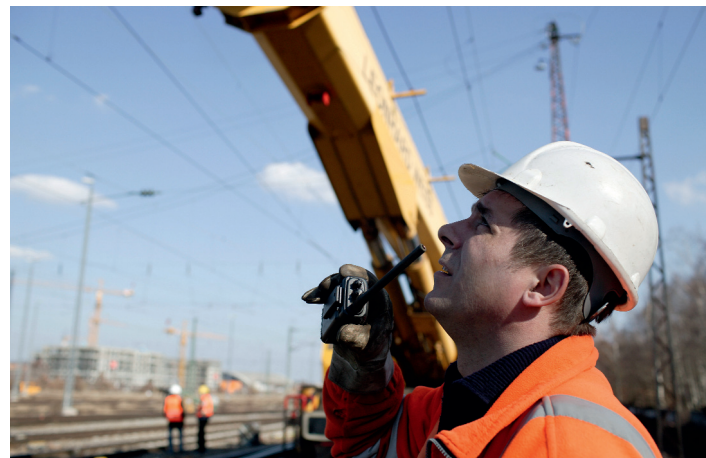

PEAK PERFORMANCE EMERGES FROM TRADITION AND INNOVATION

TRACK CONSTRUCTION NATIONAL / INTERNATIONAL

We already play a decisive role in the track construction of the future. Our qualified and motivated employees solve all technical, logistical and organisational challenges in track construction, maintenance and renewal with the greatest possible availability of the route. We provide the same high level of service for narrow gauge, standard gauge or wide gauge. We also provide extensive and reliable know-how for function-oriented general contracting projects both domestically and abroad. For our customers like railway

infrastructure companies, privately operated railways, transport authorities and owners of industrial and private sidings, we are working all over Europe. LEONHARD WEISS offers individualised and innovative solutions from project design through to planning right up to responsibility for the railway infrastructure. Our customers trust the latest technology, high-performance machinery and comprehensive expertise.

Your strong partner in Europe.

RELIABLE AND INNOVATIVE ON-TRACK-MACHINES

TRACK CONSTRUCTION MACHINERY

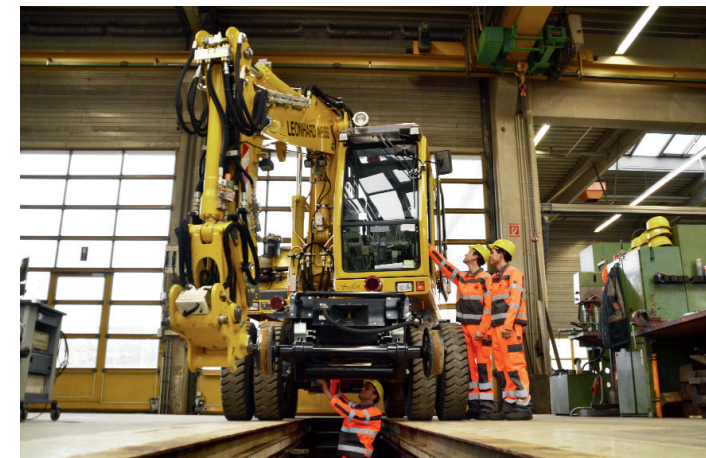

Modern On-Track-Machines characterise the equipment used by LEONHARD WEISS.

We regularly maintain and adapt these high-performance machines in our own specially equipped workshops in order to meet market demands with innovations developed in-house in close collaboration with the manufacturers. In the process, we set standards for effective, sustainable and ecologically compatible construction for the future.

Certified professionals who are appropriately trained ensure smooth and cost-effective execution meeting the challenges they are faced with.

As a recognised railway operator, we provide the complete support of a railway management service for the areas of personnel, operation, vehicles and infrastructure. LEONHARD WEISS is also ECM certified.

Fast and reliable with own On-Track-Machines.

SERVICE SPECTRUM

Track construction machinery

- Renovation technology
 - Assembly line techniques
 - Pulsing procedure
- Tamping techniques (track widths 1520 / 1435 / 1000 – 750 mm)
- Crane technology
- Railway construction logistics
 - Sleeper transport wagons
 - LW-tippers
 - Locomotives
 - SKL

SERVICE SPECTRUM

General contractor network construction

- ESTW / ERTMS
- GSM-R / ETCS
- Transport stations
- Railway crossings
- Tunnel infrastructure
- Signal foundation "LW 2010" design

SERVICE SPECTRUM

General contractor infrastructure projects

- Engineering and Turnkey construction
- Rail infrastructure
- Road and Network construction

SOLUTIONS FROM ONE SINGLE SOURCE MEAN ADDED VALUE FOR YOU

GENERAL CONTRACTOR NETWORK CONSTRUCTION

Modern and safe traffic routes also require intelligent networks.

With competent partners, LEONHARD WEISS offers tailored solutions as a general contractor for traditional or design and build contracts. Starting from a feasibility study through to comprehensive planning and land acquisition negotiations right up to the construction of the railway infrastructure of tomorrow.

Complex railway tasks entail very specific demands on the job safety, punctuality and logistics. This requires detailed knowledge of construction processes, confident application of these as well as knowledge of special processes.

In the process, logistics is of essential importance, because all material deliveries are planned well in advance and must be provided "just in time".

Benefit from our flexibility for your projects.

DISCOVER THE INFRASTRUCTURE PROJECTS OF THE FUTURE WITH US

GENERAL CONTRACTOR INFRASTRUCTURE PROJECTS

Integrated infrastructure projects with complex tasks are a specialty of LEONHARD WEISS - you get everything from one single source.

With its developed structures and decades of experience, the LEONHARD WEISS-Group plans and executes large infrastructure projects with all the corresponding services, including civil engineering, track construction, road construction and equipment technology.

Each infrastructure project is unique and represents specific challenges for project management. The high level of in-house production at LEONHARD WEISS gives you the security you need for your project.

Well-rehearsed and experienced teams assure the highest quality, reliability and punctuality for the implementation of your project across a range of comprehensive services.

Our versatility guarantees the success of your project.
